

MXCuBE Developers meeting, 6/3/2018

Present (virtually): Jordi Andreu, Michael Hellmig, Gleb Bourenkov, Milan Prica, Roberto, Martin Savko, Rasmus Fogh, Gerard Bricogne.

Apologies: Mikel Eguiraun,

Absent: ESRF

1. Minutes of last meeting, and matters arising

The minutes were approved.

2. MXCuBE reorganisation/collaboration

This point was postponed to a follow-up meeting, pending further information as a starting point for the discussion.

3. Status reports

Selected highlights

- Global Phasing had completed a successful test of their experimental workflow software (MXCuBE branch 2.1) at ESRF ID30B. Further efforts will be towards the Qt4/master branch.
- HZB Expecting to move to the master branch after the summer shutdown
- Elettra on MXCuBE3, which failed to install on CENTOS6 (Python 2.6) but works on Python 2.7. Elettra uses MD2,Tango; Gleb suggested they consider Exporter.
- EMBL-HH have upgraded to Debian Stretch, and got rid of Lima.
- ALBA are upgrading hardware, including double gripper sample changer.

4. Any Other Business

None

Next Meeting

A follow-up meeting should be arranged as soon as possible after the required background information is available and analysed. The next meeting should be after the Easter holidays, both arranged by Doodle poll. ACTION: RF
